

# The Hydrolite

by Mick Corbridge

Some time ago, an American collector contacted me regarding a lamp he had acquired and wanted information on. The lamp was a 'J. H. Nott' of Swansea - Wales, and he had found a type '2-M-6', and I had in my collection a '2-M-7'. I more recently came across a 'J. H. Nott' catalogue date 1923 showing both of these lamps (opposite page). I submit a copy of the relevant section of the catalogue for your possible interest.

**"HYDROLITE"**  
Acetylene Wind-proof Lamp  
(REGISTERED, PATENTED).  
BRITISH MANUFACTURE.

Suitable for out-door use, the light being enclosed, the lamps may be safely used on farms, etc., in the presence of straw or other inflammable materials.

These lamps are strongly made of steel stampings—the lantern and all fittings being made of brass. All parts are standardized and obtainable for replacement.

A special safety device is fitted whereby any overmake of gas is discharged into the air.

The lamp works well and gives no trouble.
